## The drill of the Future

The trade off among cost, weight, precision and manipulability of small surgery drills. As a result, for certain interventions surgeons employ suboptimal drills with higher risk of contamination and error, less comfort and a needlessly high price point.

### Features

PiccoWasp represents a single-use surgical drill powered by the following features:

- ✓ cordless pen or pistol shaped design
- ✓ low weight (< 200 g)
- ✓ dual speed (300 and 14000 rpm)

### benefits

- ② Pre-sterilized
- ✓ Ready-to-use
- ✋ Secure grip & comfortable handling
- ⚙️ High and Low speed mode
- ⊕ Suitable for a wide spectrum of surgical interventions

### use & applications

- ✓ Disposable micro drilling tool
- ✓ First-choice for special (rare or non-standard) interventions
- ✓ Back up solution to compromised in-house drills
- ✓ Suitable for spinal surgery, neurosurgery, maxillofacial surgery, small bone orthopaedics & trauma surgery, veterinary medicine or military medicine

### collaboration opportunity

- ✋ We are looking to engage in co-creation and co-development relationships and, ultimately, strategic partnerships with implant manufacturers in both human and veterinary medicine. Patent pending.
